

META-TEMPLATES IN WEBSITE DEVELOPMENT AND METHODS

THEREFOR

ABSTRACT

- 5 A computer-implemented method for creating a plurality of webpages,
which includes providing a meta-template having therein at least one of a tag and
a variable. There is included providing a user data model. There is further
included expanding the meta-template against the first user data model using a
template expander at build time, thereby obtaining a template. There is further
10 included expanding the template at run time against a data source, thereby
obtaining codes implementing a webpage.
